PROFESSIONAL SUMMARY

Full-Stack AI Builder specializing in end-to-end production systems, LLM orchestration, and high-velocity shipping. Ranked in the Top 10% on LeetCode (1761 rating), proving deep algorithmic depth. Experienced in taking messy problems to live multi-agent RAG pipelines using LangGraph, React, Node.js, and GCP. A "polyglot" builder with a founder mindset who writes production code, not just demos, and owns the full loop from architecture to UI.

CORE COMPETENCIES

End-to-End Production Systems

LLM Orchestration (LangGraph)

Multi-Agent Workflows

Full-Stack (React/Node.js)

RAG & Prompt Engineering

Data Pipelines & FAISS

Cloud Deployments (GCP/AWS)

High-Velocity Execution

EXPERIENCE & EXECUTION

Safcurl Technologies

April 2026 - Present

AI/ML Engineer Intern

- Production AI Pipelines:** Designed and deployed scalable LLM architectures on AWS/Azure, optimizing for large-scale data throughput and enterprise cloud performance.
- LLM Orchestration:** Built automated LLM benchmarking and logical reasoning systems to evaluate conversational accuracy and contextual understanding.
- End-to-End Ownership:** Translated messy business requirements into implementation-ready technical workflows and shipped enterprise-grade chatbot UI systems.

PRODUCTION SYSTEMS & PROTOTYPES

NLP Research Analyzer (Multi-Agent RAG)

Architected and shipped an **end-to-end agentic platform** for automated research synthesis. Built the data ingestion pipeline (FAISS), multi-agent **LLM orchestration** (LangGraph, Llama, Tavily), and the interactive frontend. Solved complex hallucination issues using prompt engineering and reflection agents.

NotAI - Full-Stack Code Execution Platform

Designed the full system architecture for an AI-powered developer tool. Built the **React frontend**, **Node.js/Express backend**, and MongoDB data layer. Deployed real-time code execution with Gemini-powered debugging insights, taking the product from zero to live.

EDUCATION & AUTONOMY

Bachelor of Technology (B.Tech) in Artificial Intelligence

2024 - 2028

Newton School of Technology | Grade: 8.7/10.0. Consistently balancing deep academic rigor with aggressive side-project shipping.

BUILDER ACHIEVEMENTS

Runner-Up, Snap Syntax (High-Velocity Execution)

IIT Roorkee

2025

LeetCode Rating: 1761 (Top 10%)

Algorithmic Depth

2026

TECHNICAL BREADTH (THE POLYGLOT STACK)

AI/Agents: LangGraph, RAG, Prompt Engineering, FAISS, Llama, Gemini, TensorFlow

Full-Stack: Node.js, Express, React, TypeScript, Python, Next.js, SQL, PostgreSQL, MongoDB

Infrastructure: Docker, AWS, GCP basics, Terraform, GitHub Actions, Linux
